

Inputting Your Course Requests for 2016-2017

Please log on to PowerSchool and select your classes for next year.

Please Note:

- You will choose between 6 and 7.5 total credits.
- Your teachers have recommended the best fit for you in your 5 core academic classes. If you have a question about the level you were recommended for, please have a conversation with your teacher. You will find your course recommendations in your email.
- Please select your elective courses based on your interests and then pay attention to the course description and pre-requisites as described in the Program of Studies.
- The Program of Studies is available on the FHS website (2016-2017 Program of Studies draft).

To enter your course requests:

1. Log into your PowerSchool account.
2. Click class registration on the left hand side.
3. Select your classes by clicking on the pencil in each subject area, for example, English. Then click on the appropriate course name, for example, American Literature, American Literature H or AP English Language and Composition. Click ok.
4. If you are unable to find a course, use "all courses" as they are alphabetically listed there.
5. Once you have selected all of your courses, click submit at the bottom of the screen and log out.
6. You will review your selections with your counselor so these selections are tentative. Please remember to use your teachers' recommendations.
7. **Entering your courses now allows the administrators and department leaders to begin the master schedule based on the courses students would like to take next year. It gives them a chance to offer the appropriate number of sections of courses students prefer and are recommended to take.
