

COVID-19 Protocols

Daily Screening For Parents

Every morning before you send your child to school, please check for the following:

- ⚠ Does your child have a temperature of **100.4 degrees** or greater?
- ⚠ Does your child have any other symptoms of COVID 19? *See the below list.*

- ⚠ Was your unvaccinated child in close contact* with anyone confirmed with COVID-19 within the last 2 weeks?

✗ If the answer is **YES** to either of these questions, **DO NOT** send your child to school. Instead, **begin quarantine** of your child and contact your healthcare provider. Strongly consider COVID-19 testing.

If **ANYONE** in your home has been tested for COVID-19, **DO NOT** send your unvaccinated child to school until the results have been obtained.

If your child is fully vaccinated (2 weeks after the second dose of the Pfizer vaccine), they may attend school after contact with a COVID-19 positive person or while someone within their home is awaiting a result of a COVID-19 test, as long as the child does not have any COVID-19 symptoms. However, please adhere to the following recommendations:

- Receive a COVID-19 test (PCR preferred) within 3 to 5 days after last contact
- Remain masked in public at all times for at least 14 days from last contact
- Monitor for symptoms and re-test immediately if symptoms develop - stay home while awaiting results

***Close Contact Definitions:**

- masked **students** seated within **3 feet** in the **classroom** - only applies to students
- all **adults** and **students outside of the classroom** within **6 feet** for **15 or more cumulative minutes** over 24 hours - masks irrelevant
